Summary of Qualifications

Skilled in managing application development in Java, ASP.NET, JavaScript, MVC, Node.js, FoxPro, Oracle, SQL, MarkLogic and other environments. Experienced with Agile Scrum and Kanban methodology and practices. Experienced in managing employees in a diverse and demanding environment to ensure delivery of the best possible user experience to a range of clients. Zealous advocate for the user experience. Highly motivated, results oriented, and vast experience in dealing with clients, customers, and end users of information system solutions.

Experience

Director, Release Management – Orbis Technologies

October 2016 – Present

Build strong DevOps focused group within Orbis, a government and commercial contractor. Supported large programs for delivery to top-tier Fortune 100 companies and US Department of Defense, including United States Special Operations Command (SOCOM). Led adoption of continuous integration and continuous delivery methodologies both within Orbis and within the DoD itself.

Director of Operations – Applied Software, Inc.

June 2008 – October 2016

Involved in managing all aspects of the company from support to implementation to new and current product development. Led implementation of Agile Scrum methodology, increasing engineering productivity by 400%. Responsible for many enterprise-level project management functions such as business development with well respected software vendors in the healthcare industry.

Interface and Support Specialist – Applied Software, Inc.

June 2006 – June 2008

Worked with ASI's software package for mammography information management. Worked with centers and large hospitals to fit our software into their clinical workflow. Managed various projects to automate workflow tasks with HIS, RIS and other hospital systems.

Systems Technician – Business Network Consulting

July 2003 – August 2004

Designed, implemented, and maintained a variety of Windows networks, servers, workstations, and networking equipment for a variety of clients. Consulted with various businesses on ways to improve their business model based on business requirements and technological needs.

IT Consultant – Clyde Bergmann, EEC

June 2001 – August 2006

Worked as a direct report to the CIO of EEC. All areas of IT including troubleshooting, networking, and enterprise server management. Helped to migrate a NT 4.0 domain to a 2003 Sever environment. Supported various departments including engineering & sales divisions.
